

First I oppose HR 4026!

Second:

I have been a XM user for a few years now, and mainly use the XM Radio instead of FM or AM that has been so polluted by the government. I choose and PAY for this programming that is my right to do so like cable, and should be able to listen to whatever programming I deem. I do not need to government to decide what I can and should listen to.

This is a pay service that the FCC and NAB have no reason to interfere with.

Please leave XM Radio alone so it is not ruined by anymore government bureaucracy. I PAY FOR MY CONTENT on XM. I want them to be left the way they have been running their business so far. It works and the public likes it the way it is.

Thank you.

Jonathan
